

NAMZ Off-Road Fan Over-Ride Harness with Rocker Switch
(2014-Up Polaris RZR Turbo & Non-Turbo)
Part Number: **OR-P-FOR-RT & OR-P-FOR-RN**

1. Remove Hood and locate desirable location for relay on the fire wall.
2. Mount relay on firewall with included self-tapping screw.
3. Locate and unplug the fan harness connection (in front of fan), then plug our harness in-between.
4. Disconnect the NAMZ rocker switch from our harness (*make note of the wires and their locations*).
5. Cut a rectangular hole in the dash using the mount as a template.
(roughly 1" x 2" cut out)
NOTE: ensure there is enough room behind for the switch and wires
6. Install the switch mounting plate, feed your wires through the hole and re-connect to switch. (Top right: Black, Middle: Red, Bottom: Blue)
7. Attach Fused Red wire to factory BATTERY power post under hood.
Note: The BATTERY power post under the hood requires a separate harness to provide power to it. NAMZ Part Number: **OR-P-PWR-R**.
8. Test function of the fan and switch.

WARNING! Fan WILL drain battery if left on
