

NAMZ Off-Road, Polaris Power Tap PIGTAIL (2-Pack)  
Fits: Polaris 2017-Up General, & 2018-Up Razor1000 Models  
*Part Number: **OR-P-PT-R***

1. Turn vehicle off, remove key and disconnect negative battery cable.
2. Remove Hood and locate the BUS-BAR bolted to the fire wall.  
(These have blank connector “plugs” installed from the factory)
3. Simply remove the blank connector plugs from the BUS-BAR and installed our Pigtail.
4. Route the accessory wires from your various products (LEDs, light bars Radio, Etc.)
5. The wires from our harness connect to your accessory as follows:  
**Red** = BATTERY Power (Constant)  
**Orange** = Key ON Power  
**Black** = GROUND
6. Use the (6) provided ADHESIVE lined heat shrink to cover your connections.  
***NOTE: Be sure to cover up any exposed/unused wires***
7. Reconnect the negative battery cable and test your new added accessory(s). Inspect all connections and wiring for proper installation.
