

## *Letric Lighting Headlight Alignment Ring*

*\*Professional installation is recommended.\**

1. BE SAFE, DISCONNECT THE BATTERY FIRST!
2. Our Headlight Alignment Ring is *intended for Harley Davidson 99-13 Dresser models only*. Utilize stock alignment ring for all other models.
3. Consult your factory service manual on how to properly align headlight.
4. If utilizing Letric Alignment Ring follow steps 5 – 8.
5. Remove stock adjusting ring and headlight (refer to factory service manual). Install Letric Adjusting Ring using the 8 stock screws on the outside of the ring, tighten securely.
6. Apply blue Loctite to adjuster screws and wind in until springs are seated.
7. Install headlight with the three headlight trim mount screws.
8. Position Motorcycle 25 ft from a wall. Low beam center line should be perpendicular with the headlight. The top adjusting screw will supply the vertical adjustment and the horizontal adjustment can be made with the side adjusting screws.
